

Website Project

Plan For Website: We are Making a Website basically we can say that its a learning website not fully but almost. So the plan is We will make website and through this website we will provide vital codes for developer, study materials for student, question and answers for engineering exam (Jelet, Semesters), Assignments, Final-year Projects. And we try to gain a mass audience for website.

1. Target Audience: Students, Coders, Developers.
2. Money Making: Google AdSense, Book selling, Website, App Templates selling.

Causes Of Making Website: As a Developers Sometime We found a Very Vital problem to solve the problem and then we have to write a code which is taking much time and effort as same as a student we are finding data answers solutions for our study which is a very hard and problematic so there we are provide this codes and materials which makes this problems to easy.

Senior-Developer:

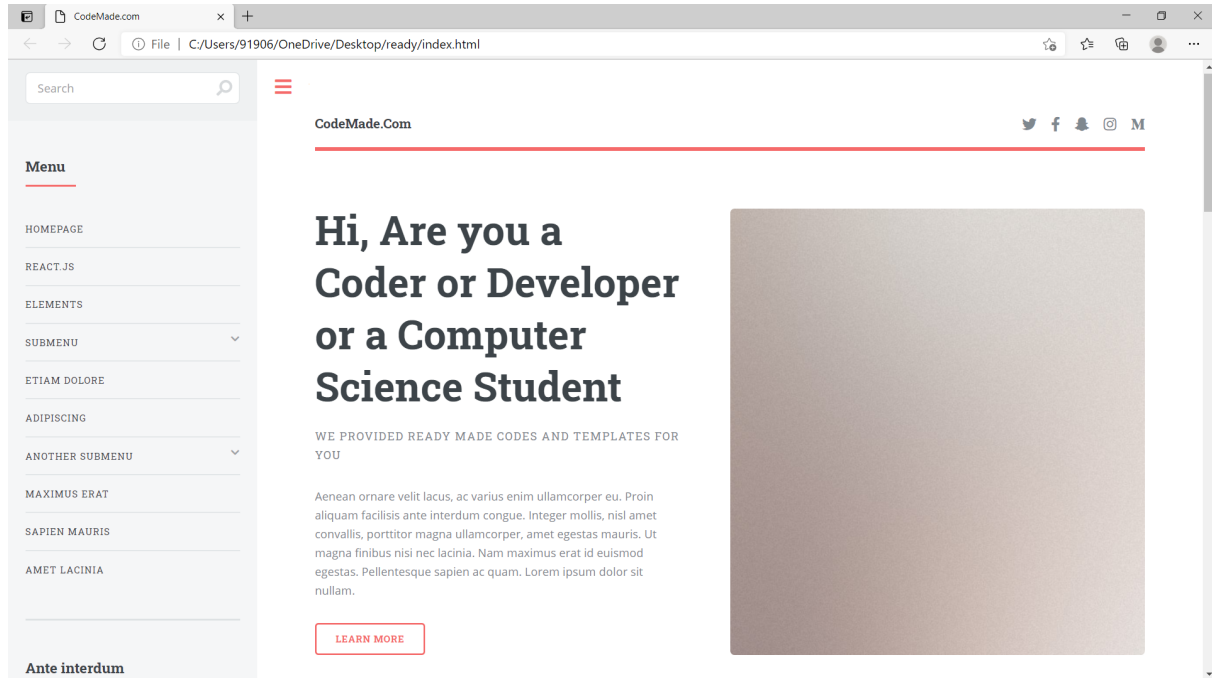

1. Indranil Bakshi

Developers & Content Creators:

1. Akshat Kumar Prasad
